USB Gateway
USB 300F

USB 300F is a small USB stick which connects PC's and smart home servers to the world of EnOcean based radio products.

USB 300F provides bidirectional EnOcean radio functionality which is controlled via a bidirectional USB interface.

Radio messages can be sent and received by a USB Host system connected to USB 300F.

Additional features include signal strength information for received radio telegrams and the option to send user-defined radio telegrams.

Features:

- Receive messages from self-powered switches and sensors
- Send messages and control actuators
- Report signal strength value
- Visualization of radio telegrams with DolphinView
- Virtual COM Port driver (FTDI) for Microsoft Windows, Linux and Apple Mac
- EnOcean Serial Protocol 3 data format

Technical Data:

Housing size:	70 x 23 x 9mm (incl. transport cap)
Weight:	12g
USB/power supply:	Type A
Operation temp.:	0°C - +50°C
Storage temp.:	-25°C - +70°C
Humidity:	0% - 90%r.h. (no condensation)
